

Verba Release Notes

Verba 3.0 SR4 Release Notes (build 3.0.4000)

This document lists new features and fixes released in Verba 3.0 SR4 Release Notes (build 3.0.4000).

Release Date 2006-10-02

Document Download Date 2022-09-28

Release highlights

ID	Component	Description
RI-001723	Recording - Passive	Improved support for offline recording operation when recorder has no connection to database
RI-001724	UI - Web Interface	Batch user import
RI-001725	UI - Web Interface	Scheduled reports

Known Critical Issues

There are no known issues in this build.

Critical Fixes

There are no new critical fixes in this build.

Feature Improvements

ID	Component	Description	Added in	Date
RI-001726	Recording - Passive	Improved offline database support provides better operation in case of losing connection to the database server		2014-08-10
RI-001727	UI - Web Interface	New user import feature enables importing users from CSV file, Cisco Unified Communications Manager LDAP (DC Directory) and Microsoft Active Directory. Provides that ability to create user and phone mapping entries in Verba database in a batch		2014-08-10
RI-001728	UI - Web Interface	New report scheduling feature provides the ability to run scheduled Verba Reporting Tool reports		2014-08-10
RI-001729	UI - Web Interface	New feature in Verba XML Service enables users to mark a call for recording automatically, after calling any function on the ongoing call. There is no need anymore to also press the record button after e.g. a comment has been added to an ongoing call. This feature only applies to extensions using on-demand recording mode.		2014-08-10
RI-001730	UI - Web Interface	New location administration mechanism. After this release locations (host names of the Local Record servers) are not automatically administered. Every new location has to be added manually by the administrators in order to provide searching ability for the given location.		2014-08-10
RI-001731	UI - Language	New partial support for German language. Verba XML Service now available in German.		2014-08-10

Fixes

ID	Component	Description	Fixed in	Date
RI-001733	Recording - Passive	Log rotation problems in special situations		2014-08-10
RI-001734	Recording - Passive	Database connection failure after disconnect in certain situation		2014-08-10
RI-001732	Recording - Cisco	Encoding issues with international characters in Cisco Skinny messages		2014-08-10
RI-001738	UI - Web Interface	slow response time in Verba XML Service		2014-08-10
RI-001739	UI - Web Interface	Problems playing back long calls and getting not enough memory notifications from the server		2014-08-10
RI-001740	UI - Web Interface	Issue with deleting users		2014-08-10

RI-001737	Platform - Media Processing	Problem playing back Speex files. Resolution includes a new Speex plugin that has to be installed on each client workstations, where Speex compressed file playback is required. The plugin can be downloaded from the Verba Web Application. No plugin is required for other audio file formats	2014-08-10
RI-001741	Platform - Monitoring	Service can not be started on servers running Windows 2000 operating system	2014-08-10
RI-001735	Platform - Storage Management	Log rotation problems in special situations	2014-08-10
RI-001736	Platform - Storage Management	Problems with directory location of Speex files	2014-08-10
